SUMMARY

Highly motivated computer professional experienced in computer hardware or software troubleshooting and repair. I am looking for work that will help me apply what I learned about full stack web development. During the bootcamp I learned how to use basic Git commands, creating dynamic and responsive web pages, creating applications with React, NodeJs, Express and MongoDb. Some of the projects I made are, a static Portfolio Page, an E-commerce React App using the FakeStoreApi for populating data with mobile layout and contributed to a JavaScript game for a group project.

EXPERIENCE

IT Specialist

AMA Computer College - Naga Campus

📅 June 2017 - April 2022   📍 Naga City

- Supported branch employees of 7 departments with computer hardware, software or network issues.
- Created a Student Permit template on MS Excel where the user can select a student's name, then data like date, names of signatories and other information will be displayed and printable to 6 permits in one page. This reduced hours in encoding the student's data and printing them manually one by one.
- Ensured that main firewall and CCTV Camera's are active and has access for remote viewing.
- Maintained office and laboratory equipment's in good running condition.

Freelance Computer Technician

Self-Employed

📅 February 2014 - current   📍 Calabanga

- Troubleshoot and repair of desktop or laptop computers from software to hardware issues.
- Replace or upgrade computer hardware or computer software on desktop or laptop.

EDUCATION

Bachelor of Science in Information Technology

University of Nueva Cacerres

📅 2009 - 2013

📍 Naga City

Full Stack Web Developer

Uplift Code Camp

📅 2022 - current

📍 Manila, NCR
